- **Project Type – Site Wide MDU**
- **Project Value – Circa £950,000.00**
- **Project Duration – 2015 – Present**

What We Did

Code Security Systems LTD Designed, Installed and Delivered the IP CCTV, Access Control, Video Entry, IRS TV/Satellite & Gates Entrance Systems.

Code Security Systems LTD have provided the site-wide systems as shown above to multiple phases including Block F, Block H, Block L, Block M, Block N, Block T, Block U & Block Q with more phases in the pipeline.

Delivery – This project was delivered via Multiple Phased Electrical Contractors Working Closely with Redrow Homes.

How We Did It

Code Security Systems LTD worked closely with the Electrical Contractors to deliver the site-wide phased multi-dwelling blocks.

From the very first phase that Code Security Systems completed no stone was left unturned to ensure sufficient capacity was in place for all future phases.

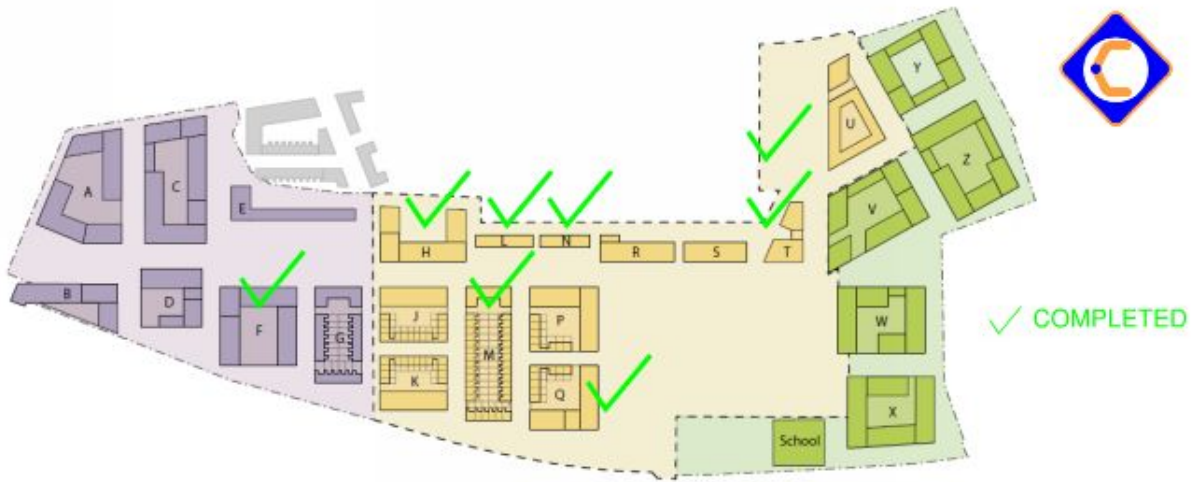

This meant that dedicated networks, IP schedules and huge planning was involved to cope with multiple glass panels, IP touchscreen handsets all with android interfaces, access controlled doors and an array of satellites to allow services such as Sky, Hotbird, Turksat, ArabSat, FM & DAB.

All security services were designed in-house utilizing our expert CAD technicians whilst for the installation of our IRS/TV Systems we employed our specialist partner of whom we have a long-term relationship and have completed many projects of the same scale with.

Benefits To Our Client

Turn-key Solution, Project Team Continuity throughout entire project, Completed All Phases On Program, Site Wide Solution With Future Capacity
